

To Whom It May Concern,

I am pleased to recommend Prajwal Athreya for a position on your team.

I had Prajwal join my team as a co-op in Q3-Q4 of 2024. Our team's focus, being one of the core Kubernetes teams within Akamai meant it was not a small task getting up to speed on the technology we were working on. Despite joining our team with minimal prior Kubernetes experience he was immediately able to pick up the basics and excel past the basics expected of co-ops. Prajwal shows a powerful drive to learn new things and is always looking for feedback and ways to improve. By the end of his time on my team he was a core member and actively participated in team discussions, asking questions and providing feedback to other members of the team. I have no doubt he will also be a great fit on your team and feel free to contact me with any questions on his work at Akamai.

Thanks,

Evan Johnson

Principal Lead Software Engineer, Cloud Native

Akamai Technologies
